

STIC

ON POINT

Educ Students Shared and Exchanged @ xpo 2019

The Education Expo was held on September 14, 2019, at Joseph Mary Building (JMB). It's a collaborative effort among education students to help each other in sharing numerous teaching techniques and materials to improve the teaching-learning achievements. These teaching-learning exhibitions conveyed know-how to future educators and allowed them to participate in different activities set in different locations around the venue.

This kind of collaborative activity, organized by Dr. Mark Pa-alisbo, prepared our incoming off-campus observers and teachers in making of lesson plans, teaching aids, and motivational or learning engaging activities.

Education Expo presenters showed off their skills and knowledge in acquainting the attendees with their teaching-learning exhibits as they expressed their encouraging feedback, constructive criticism and unsolicited advice.

At the end of the Academic Expo, a lot of teaching learning accomplishments were realized.

AR visited Sriracha Aviation

Ajarn Praveen Shaju brought the 2nd year Aeronautics students for a study visit at Sriracha Aviation on 4 September, 2019. The aim of the trip was for students to see the structure of the airport, flight simulation, showcase of various aircraft being used for training, and control tower repairs. Also, it gave the students to practice flying an aircraft, maneuvering various tools, and following flight procedures.

At Sriracha Flight School, our students had gained a lot of new real-world experience. Firstly, they learned the 3 main types of aircraft: Cessna -152, Cessna-172 and Diamond DA-42. Through the flight school, students may secure different types of pilot licenses such as PPL, CPL, IP, IR and ME. Aircraft maintenance and Quality Assurance (QA) are also covered in their training program. Furthermore, they have 30 aircrafts in Sriracha Aviation School. Cessna-152 has analog instrumentation on board while the Cessna-172 and Diamond DA--42 make use of digital instruments. Both of them can be used for take off and landing training within the Sriracha area. They have their own control tower and runway. There is no taxiway so training aircrafts should back track. The runway designator is 02 and 20. They also have PAPI lighting, threshold, holding position, and an aircraft hanger.

In the training room, there are 2 flight simulators. Both are digital instruments with a Primary Flight Display (PFD). During the meeting, school representatives said that there are many job opportunities available. Example available positions include: flight dispatcher, QA, maintenance, safety, pilot, technician, and instructor. We highly recommend everyone to visit Sriracha Aviation, located in Chonburi Province on Thailand's Eastern Seaboard, especially to those who aspire to become aircraft pilots.

(Jindamaneewongkam – Education English Y3)

Year 2 and 3 went to Thai PBS and Channel 3

From the recent visit at Thai PBS Channel on August 27, the Communication Arts/Digital Media Y2 students along with Ajarn Prissana Kampusiri, were able to experience the real atmosphere of present media setting as it adapts to the innovative demands towards its future structures.

Since Thai PBS is a public TV channel, it focuses on providing Thai people with programs that promote truth and public service. The non-profit TV station advocates in work ethics that gave clearer visions of their goals and objectives.

This educational trip gave our students the opportunity to visit Thai PBS news rooms as well as their other various studios. Students were amazed with the facilities and equipment that they had in place. They directly glimpsed at the level of work difficulty, especially during the process of doing live TV shows. Later, they realized that working in television requires timeliness (punctuality) together with professional and technical skills crucial to the success of the station and their projects.

On August 28, 2019, CA Year 3 students together with Ajarn Maylada Sarutibawondej spent some time visiting Channel 3 station to conduct educational observation. The TV Executive Director was kind enough to allow our students to visit their station buildings. They had the chance to perceive the tangible mood of news making and other sorts of media processes. Furthermore, along this trip, the students saw the importance of both traditional and nontraditional learning pedagogies. Also, they had witnessed how media people do their jobs and the working atmosphere where they spend most of their time.

This kind of outside-the-classroom activity gave our students more wisdom and experience to bring into the classroom learning process for use in future works and for the development of learning to work professionally and successfully.

TANLAND

Opened its Door for STIC's Family

(Parichat Lasrijan, Waraporn Kongkaew and Chewaporn Wongnoy – Business English Y2)

On September 11, 2019, the Faculty of Humanities and Social Sciences major in English for Business Communication organized a study tour for 2nd and 3rd year students at Tanland in Ayutthaya Province with Ajarn Leo as the teacher-guide.

The Tanland was well-maintained. Students enjoyed their tour of the establishment. They were eager to acquire some employment related knowledge and work processes within the different departments as well. After gaining some knowledge, we also appreciated the structural beauty of the place which is interesting in various aspects. Tanland promotes Zero Waste and Zero Manpower. As we went along with the observation, we saw gigantic machines and equipment which perform most of the production process. This company has this desire to make use of AI (artificial intelligence) in production. Along with this, as the company practices Zero Waste, some areas we visited displayed recycled decorations, furniture and artwork.

After that, we went to the Ayutthaya Floating Market. It is a great place to relax and a very attractive location for tourists. Foreigners often take time to visit and enjoy the various historic sites and cheap prices in shopping areas.

These activities are very interesting for us. We were able to see how work is being done and received more ideas that will be helpful for our future career.

Business English Seniors Bid Goodbye

Business English Seniors' Byenior Party was held on 16 September, 2019 at Joseph Marie Building. The theme of the event was Isan Indy. This event was participated by the members of the BE Family: students from year 1 to year 3, their advisors and lecturers.

This event bid farewell to the graduating students. During this party, we were given the chance to build a better relationship with teachers and students from the 4 year levels of the Faculty of Humanities and Social Sciences, Business English major.

We were very happy taking part in this event because we were able to maintain a strong relationship with the seniors. We expressed our love and appreciation to our older brothers and sisters by giving them sentimental gifts, displaying some performances, dedicating songs and mentioning our wishes and blessings for them.

It was a simple celebration of life, love and success yet, it was worthy to look back on.

AR and

ATC Reigned

The Freshmen Night

September 6, 2019 was a very memorable day for all the STIC's freshmen as they spent it with enchantment and fascination of Freshmen Night - an Egyptian-themed Prince and Princess Coronation Night. Our freshies attended the annual event with huge excitement as they see their co-freshies coming in to St. Mary's Building in their wonderful gowns. Some of them were hard to be recognized because of their elegant appearance. Others really took time to dress up to be "in".

Princess @ STIC 2019

The lovely night began with the runway walk of the Prince and Princess' candidates in their glitzy Egyptian costumes. The event venue almost exploded with all the cheers coming from our students.

During the pageant gaps, our freshmen in groups displayed some great performances to add bright lights to this event. The performance of the AR and ATC majors came out on top beating other 5 groups of performers.

The candidates of the Prince and Princess hit the ramp in their college uniform, casual wear and evening gown and formal wear. They also showcased their talents and wit during the Talent and Question and Answer portions.

After long hours of ramp walking, smiling, waving, changing of outfits, re-touching of make-up, showcasing of talents and answering questions, the candidates from AR and ATC hailed as the pageant's winners: Mr. Takdanai Mongkudkaew (STIC's Prince 2019) and Miss Yada Pongkwansuk (STIC's Princess 2019).

The night ended with so much pride from supporters and grand achievements from all candidates as the event ran impressively and successfully. Kudos to all the people who worked so hard to give us this never-to-be-forgotten moment.

(Unchalee Mukkhakang - Education English Y3)

STIC won Mister Universe

Nakhon Nayok 2019

"MISTER UNIVERSE Nakhon Nayok 2019" was held on Saturday, 21 September 2019 at the meeting room of Chulachomklao Royal Military Academy, Muang District, Nakhon Nayok Province. There were many honorable guests who attended this prestigious event-that includes both major and minor sponsors and some local officials.

The venue was filled with much excitement as the 19 handsome candidates started to walk in front of the audience in their casual wear. They delivered very impressive introduction that was the spice on the meals set on each table. Then, they did another ramp walk in their sportswear provided by the sponsor.

From 19 candidates, 11 of them moved on to the next round. Three candidates were students from our college and were among the semi-finalists: Nuttawut Tumnidee (BE Y4), Thanadech Nopsuntair (ATC Y3) and Chanawoot Phuardun (ATC Y3). The semi-finalists hit the ramp once again in their formal wear followed by the Question and Answer portion. From the 11 gentlemen, 3 handsome aspirants were called in as the finalists. Another set of Q and A was done for the final ranking.

Our candidates Thanadech Nopsuntair achieved 3rd runner-up and Nuttawut Tumnidee was declared as this year's Mister Universe Nakhon Nayok.

The pageant's winners received several prizes both in cash and in kind: GIFT VOUCHERS from the official sponsors that include TRUST medical clinic and dental clinic for the winners' cosmetic treatment.

The whole STIC family felt proud of their achievement. Congratulations to us and good luck to the national pageant which will happen in October.

OTEL majors

Visited PATTAYA

(Ratchadaporn Namkasa – Education Y3)

On Saturday, September 14, teachers and first year students of the Faculty of Business Administration (Hotel and Tourism major) visited Pattaya, Chonburi. The first place they visited was Silverlake, a famous vineyard at Khao Chi Chan. After that, they visited Ban Amphur Beach.

Both teachers and students had really enjoyed their day trip. It gave rise to dazzling reminiscences.

TRAVEL WITH FRIENDS

Science Camp

Wat Noensaard School

Teachers and students (year 1 to year 4) in the Faculty of Education, Science major organized an outdoor camp on Friday, 6 September 2019.

The camp activity happened at Wat Noensaard School, Nakhon Nayok. Activities included are as follows: playing of various fun games, teaching children how to make herbal mosquito repellent, doing agricultural plots and planting non-toxic vegetables.

Both the camp facilitators and participants had so much merriment in completing all the scheduled activities. Not only that, all of them reaped so much brainpower and acquired beneficial life skills.

(Titima Benmas – Education English Y3)

NURSING ACTIVITY

FOR STRONGER BOND

At St. Mary Building, some fun activities were shared and participated by all the Nursing Science Faculty students on August 28, 2019. The purpose of this bonding activity is for each family member to be acquainted with the aspiring circle of nurses. Moreover, it aims to initiate mentoring, exchanging of learning and college life survival tips and sharing of helpful advice. All the participants enjoyed engaging themselves in several activities.

It was a good start for us freshmen to feel secure and at home with our new found family under the loving care and guidance of the Faculty of Nursing Science. We hope to have more of this kind of activity to maintain and strengthen the bond that we had started that day.

(Nuttachai Pengmanee – Nursing Science Y1)

Training for

Future Leaders

Freshmen and sophomores from each major attended the Leadership Training 2019 seminar held on Saturday, 31 August, 2019 at Joseph Marie Building. Activities like dominos, exchanging of ideas, and lectures on how to be great leaders in the future were pulled off. This training activity was arranged for STIC students to develop positive attitudes and promote analytical thinking skills towards the importance of leadership as well as to prepare them with the demands of future life and employment. This kind of program imparted leadership knowledge and skills that STICians can apply not only in their daily life but also in the coming years once they become active members or leaders of the Thai nation.

(Thidarat Nak-udom – Education English Y3)

SAMSENWITTAYALAI SCHOOL HAD AN OCULAR VISIT

On Friday, 30 August, 2019, our college, St. Theresa International College was visited by some teachers and students from Samsenwittayalai School. They spent several hours to observe how teaching and learning occur in actual environment. They were also toured around the campus for them to see the educational institution's learning hubs and fun zones. Also, skillful students displayed their learning strategies and activities to inspire the grade 12 students to study at STIC.

In conclusion, the visit gave our college the chance to market our institution to prospect year 1 students for the next academic year. We hope that they would be motivated to enroll at STIC and experience the best college years in their lifetime.

(Jirawan Phromdee – Education English Y3)

HOW TO PREPARE FOR THE FINAL EXAM

The final exam is a time where a lot of tension arises. It is the last step in testing their knowledge gained from lessons that have been studied before moving on to the next academic level.

We have some interesting techniques for our fellow STICians: first, create exam guides according to your style and modify them depending on your knowledge and understanding. Next, ask help from your teachers or from anyone who can guide you on your review time. Tutoring in groups leads to more lesson comprehension than reviewing alone. Exam guidelines may help but do not depend so much on them because the contents of the guide may not always cover the actual exam content. Of course, you can't understand or remember the content all at once. Therefore, take a break and don't repeatedly read too much. Try to breathe some fresh air and look for some healthy snacks to eat. Effective exam review time must be accompanied by sufficient rest. You should find some time to sleep well. Prioritize your subjects well because the difficulty in each subject is not the same for some people. You may realize that a certain subject needs more focus because you need to improve your grades. Therefore, the order the subject importance must be optimized and the study exam formats should be considered. If the items are multiple choice questions, the learners must understand definitions and concepts of the answer. If it is an essay exam, focus on comprehension and all the concepts presented.

Whatever examination review techniques you practice, make sure that they're effective. If not, try other techniques and find the most appropriate for you. At the end of the day, what matters most is passing all your subjects, move to the next academic year level, and graduate. Whatever examination review techniques you practice, make sure that they're effective. If not, try other techniques and find the most appropriate for you. At the end of the day, what matters most is passing all your subjects, move to the next academic year level, and graduate.

(Sunitha Bunlujitr – Education English Y3)

STIC'S STUDENT LOAN REQUIREMENTS

(Patomwan and Somrudee – Education English Y3)

To avail student loans, we must complete 36 hours per academic year of volunteering-related activities.

These volunteer activities must be beneficial to society or to a certain community which do not require any compensation. Activities like on September 5, 2019 where a group of student volunteers journeyed across campus to pick up litter. Also, on September 19, 2019 where volunteer club members and several first year students joined together for tree planting activities. It was an event for a greener college environment and for decreasing the surrounding pollution while providing cleaner air for all of us to breathe, both inside and outside the campus. Other students took time to do a clean-up drive in temples nearby to the college and do volunteer English teaching at some communities. These kinds of activities aim to give back to the society both for its improvement and sustainability.
